Please note that during storage and transportation, especially at high ambient temperature, some of the oil and grease used for assembling may leak and stain the packaging. This is in no way detrimental to the product, wipe off the excessive oil/grease with a cloth.

⚠ Warning!

Before installing this product, read the Öhlins Owner's Manual. The shock absorber is an important part of your vehicle and will affect the stability.

Steering Damper for Ducati

SD 031

Mounting Instructions

How to install

⚠ Warning!

It is advisable to have an Öhlins dealer install the steering damper.

When installing, read your Vehicle Service Manual.

1

Put the motorcycle on a workstand so that the rear wheel barely touches the ground. Loosen and remove the original steering damper.

⚠ Warning!

Make sure the vehicle is securely supported so that it will not tip.

2

Install the bracket assembly (02230-12) to the upper triple clamp. Use the short bolt (01046-17) and shorter sleeve (02239-01).

3

Install the Öhlins steering damper to the bracket assembly. Install the end eye to the frame bracket on the right side. Use the bolt (01046-02) and the longer sleeve (02239-02).

👉 Caution!

Make sure there is clearance when turning the steering to the left and right end positions and that the damper is not used as a stop.

4

Tighten the bolts to correct torque.

5

Set the damper to the recommended set-up in this folder.

👉 Caution!

Make sure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the steering damper.

⚠ Warning!

Before riding, always make sure that the basic settings made by Öhlins are according to recommended Set-up Data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up the shock absorber.
